Natureworks - Aquariums

Artificial Corals & Sea life

Aquaria and decorative components

From prehistoric lungfish displays to entire coral reefs, Natureworks has a history of producing absolute realism in habitat decor.

The elements needed to recreate such a naturalistic environment are all hand crafted to ensure perfect realism, be it huge Amazonian lilies, coral or the decaying logs from the sunken forest.

These materials are carefully specified to ensure no contamination of water will occur. Projects include:-

- 1. Shanghai Oceanarium*
- 2. A massive fit-out at Shark bay - Sea World - Gold Coast*
- 3. World of sea theatre - Sea World - Gold Coast*
- 4. Polar Bear Shores - Sea World - Gold Coast*
- 5. Guangzhou China - Coral Encrusted Columns in Production*
- 6. Great Barrier Reef Mobile exhibit - & Underwater Black light mini Golf*
- 7. Sydney Aquarium - Rock Wall panel*
- 8. Underwater World - Original entire fitout of the Oceanarium*
- 9. Adelaide Zoo - Fresh water Habitat Aquarium Exhibits*
- 10. Daydream Island - building of all coral bommie formations for the new lagoon. Previous works involved installation of the coral bommies in the southern end of the island*
- 11. Cairns Aquarium - Supplied custom made turtles*
- 12. Numerous components for various zoos and habitats exhibits.*

Travelling Barrier Reef Exhibit Live sea life in an artificial environment

Great Barrier Reef Mobile Exhibit

In 1981 David and his (wife No.2 Irene) built a travelling trailered diorama of a reconstructed museum style coral reef diorama designed to travel the fair circuit in Europe and the United States. It was designed to fit into a 40ft container and was toured for 2 years throughout England and the U.S.

It showcased over 2000 corals and reconstructed marine organisms reproduced to museum standard.

It was sponsored by the QLD Government of the time under Joh Bjelke-Petersen, Heron Island, the P&O Group & Air Pacific.

It toured the most famous fairs in the U.K and the U.S including the Calgary Stampede, and the largest state fairs .It was a paid admission and could accommodate 2000 people per day as a "Peep Show".

It was designed to recapture the magic of one's first "look into" a coral rock pool on the Great Barrier Reef.

The story of the highs and lows of this undertaking is a hard-to-be believed story of Adventure, difficulties, and logistic mayhem.

Enclosure Fitout Design and Construction of various exhibits - interactive Visitors Centre

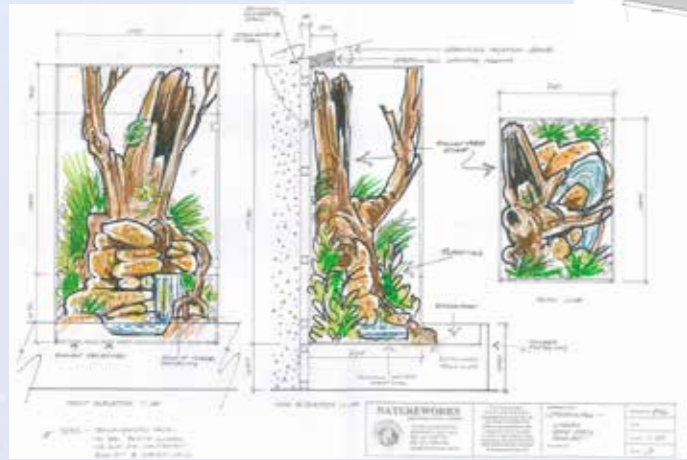

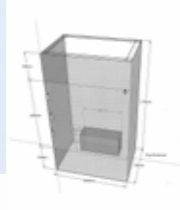

Natureworks works closely with their client and offers interpretations of the clients requirements and suggestions. Natureworks design artists can provide the initial concept art with some inspiration and suggestions within the space required.

All work can be tailored to size and volumetric shape, once the client has settled on the respective cabinet designs then we will go into more detail.

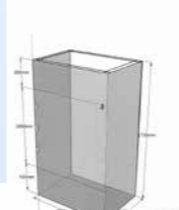

The concept art below was developed for an interactive visitor's centre. It is a 200sqm space where they intended

to address environmental issues in an interactive and engaging way. Part of the exhibition will involve incorporating live animal displays to replicate mother nature.

SEA SLUG OR NUDIBRANCH
CUSTOM MADE

Nudibranchs are found all over the world, but they're most prolific in warm, shallow sea water. Their coloration varies widely, from the muted colours of some easy-to-overlook types to the neon, clown-like appearance of others. Likewise, their physical forms are extremely varied. One consistent characteristic is the "tentacles" on the heads which allow Nudibranchs to feel, smell and taste.
